For your children...

With schools currently closed, now is the perfect time to either teach your children how to touch type or improve their typing skills. Our junior edition is simple, easy to use and designed to encourage learning.

Depending on attention span, break 'the basics' module into 5 x 20 minute bite-size sessions and then engrain the learning to muscle memory by progressing to the 'Just do it' section. Finally, develop speed and accuracy in our 'SpeedBuilder' module.

Our Junior edition is suitable from age 6+ and uses only real word vocabulary. Whilst younger children may not have the vocabulary, through repetition of copy typing real words, spellings are ingrained to muscle memory, leading to automaticity!

We have many cases of children copy typing in excess of 60 wpm and as many teachers have stated, 'vocabulary will grow as their learning progresses'.

"I am a self-taught, 3 fingers per hand typist and know that I can do better. Now that we are all working from home, we have no excuse not to up our game and all learn to type. I would encourage all assessors to take up the challenge and complete this course with me. Bring it on!"
